

Juuway – the team

Stefan – CTO

Stefan has been working in internet technology and web development for more than 10 years. He worked for international companies like Saatchi&Saatchi, ZF Sachs AG, TeamBank etc. and did successfully set up some own internet projects like buylando.de, 88qian.com or gomai.la. Stefan loves biking and diving, he just recently got his diving licence and hits the oceans all around Taiwan and elsewhere in the world. And, for sure, he loves good food.
